**Cyber Fraud: Ransomware and Business Email  
Compromise - How To Avoid Becoming A Victim and  
What To Do If It Happens To You**

**Program Specifics:** Cyber Fraud is on the rise, it can disrupt your business and result in substantial monetary loss. There are over 4,000 Ransomware attacks a day in which Cyber Criminals gain access to computer systems and restrict use until a ransom is paid. Cyber Criminals will also hack into the email accounts of one or more parties to a transaction and re-direct closing funds by sending fraudulent wiring instructions. Since 2013, there have been over 22,000 cases of email compromise involving over 3.1 Billion Dollars. We'll review some detailed examples of Cyber Fraud and, in doing so, we'll focus on how to avoid becoming a victim and what to do if it happens to you.
